The Ultimate Comfort in Office Seating

The Ergohuman from Mesh Office Seating (UK) Ltd combines comfort and style in an eco-friendly ergonomic office chair. Designed for comfort with flex zones for lumbar support, multi-dimensional adjustable armrests and an adjustable headrest.

Sarah Chatwin, Alexander Technique emphasises the importance of adjustable office chairs "Having chairs at the correct height for your stature is an important way to support good posture".

With the Ergohuman, function combines with aesthetics and the environment. Polished aluminum frame and base with stylish leather, fabric or mesh and a range of colour options in a 97% recyclable office chair.

In addition to the Ergohuman, the Mesh Office Seating range includes the Enjoy, the luxurious Ergohuman Plus, the Nefil and Mirus office chairs, all of which have a simple single lever control to operate the main functions of seat height, seat depth and back tilt. A guest chair, the Lii complements the range and is available in a four-legged or cantilever design.

Mesh Office Seating (UK) Ltd is the sole authorised distributor of a range of ergonomic office chairs throughout the UK and Ireland. The chairs are distributed through a dealer network of office furniture retailers, architects and designers.
